Gometrics

T210 Portable digital pressure gauge

EUR €

USD \$

Tinycal T210 Series digital pressure gauges are microprocessor-based portable instruments designed and manufactured by Gometrics for the indication of pressure value.

The instrument has been designed to act as a manometer and as a milliammeter, which gives it greater versatility, allowing with a single instrument the calibration of electronic pressure transmitters by reading both the pressure generated and the 4-20 mA signal from transmitter output, acting only on a key of the instrument.

The equipment incorporates a pressure sensor made of stainless steel, which, together with the overpressure it supports, guarantees a long life for the instrument.

The front keyboard, ergonomically designed for use with one hand, allows the following functions:

- Engineering units change (bar, kPa, kgf / cm², mbar, psi, mmHg, mH₂O, cmH₂O, mmH₂O, atm)
- Auto steel
- Input selection: pressure or current

The weight and size of the Tinycal pressure gauges allow the realization of calibration operations both in the field and in the workshop, quickly and efficiently. For desktop use, it has a built-in lantern that makes it easy to read.
